

Get Out Of Jail Free Card David Christopher, M.H.

Not to be political but even my favorite president, Ronald Reagan, did some bonehead things.

The worst was giving the richest corporations in the world a ‘get out of jail free card.’ You have to understand that when parents lose children to any product they get angry and sue the responsible party, even if the rest of the world considers that product to be ‘life-saving.’ The product manufacturer’s representatives tried to diffuse the situation by claiming the death to be a one in a million coincidence. The problem with this claim is that it is a

figure pulled out of thin air. When these ‘isolated rare cases’ found out that there were thousands of similar cases the judicial feeding frenzy started and the corporations were paying out millions of dollars in compensation. Rather than make their products safer, these corporations went crying to the president for relief. They threatened the nation by claiming that they would stop manufacturing their life-saving product unless they received full immunity. Immunity was granted and NVIC was established (National Vaccine Injury Compensation). The law basically doesn’t allow lawsuits against vaccine manufacturers. It takes these cases out of the judicial branch of government and requires these families of vaccine damaged children to sue the government through the executive branch with its myriad of self-serving bureaucratic regulations. These families spend hundreds of thousands of dollars in legal fees and an average of five years fighting. Most families do not have the resources or time to go through the process especially when the government determines the death of a child is only worth \$250,000.

Big Pharma’s doctors and representatives claim that only one child in a million is damaged. If that is the case there would only be 350 cases in the USA. Since only one in five cases are compensated, that means only \$17 million would have been paid out. However, \$3.5 billion has been paid out. That figure represents a lot of damaged children and or deaths of children.

It is estimated that it costs \$3 million to raise and care for an autistic child. Of the 1,000,000 children diagnosed with autism only 5,000 have tried to get compensation. Since the CDC has declared that there is absolutely no connection between vaccines and autism, all of these cases are left in limbo. Of course they are in limbo. That would cost the government \$3Trillion for the original million damaged children plus the compensation for the 100,000 new cases every year. Here is the kicker, if left unchecked, at the current rate of growth, 1 in 2 newborns will have autism by 2035.

Whether you are pro-vaccine, pro-choice of which vaccine your child should have or anti-vaccine you should view the movie VAXXED. It is simply a documentary about fraud in the CDC. We as parents need to know if these vaccines are safe. Congress needs to depose Dr. William Thompson, a senior scientist at the CDC, who is a whistle blower and needs to be heard. It is a win, win for the consumers pro or con. Let us all find out if he is lying or telling the truth. I personally believe that this is the best documentary I have ever seen. If Dr. Thompson is correct then it is up to all of us to get involved, contact our representatives and avert this epidemic that is destroying our children. Info about the movie is available by scrolling down.
