

Gain-Of-Function Research Fatalities

David Christopher, M.H.

One of our subscribers sent me a synopsis of a 55-page research paper on the worldwide threat posed by Gain of Function Research. The author, Dr. Peter Breggin from Bethesda Maryland, informs us that, “The stated purpose [of Gain-of-Function Research] is to learn to prevent and treat future outbreaks; from dangerous pathogens, including SARS-CoV-2 as well as two earlier accidental escapes by SARS viruses in 2004 from a research facility in Beijing.”

Peter Daszak an expert in disease ecology led the project which focused on “spillover potential” which is the ability of a virus to jump from animals to humans.

According to Richard Ebright, an infectious disease expert at Rutgers University, the project description refers to experiments that would enhance the ability of bat coronavirus to infect human cells and laboratory animals using techniques of genetic engineering.

In order to prepare a defense for a disease that does not exist researchers would have to create the disease.

In 2014 then President Obama ordered a stop to this dangerous research. However, the longstanding bureaucrat, Dr. Anthony Fauci skirted the President’s order and found other ways to fund the research. He passed funds through a nonprofit organization (EcoHealth Alliance) to WIV (Wuhan Institute of Virology).

In April 2020 after the Chinese American collaborations became publicly known, President Trump again canceled funding for this dangerous research. Fauci again has skirted the President’s orders.

I find it ironic that the man responsible for funding the research that resulted in this worldwide pandemic, Anthony Fauci, is overseeing the handling of this Coronavirus 2 pandemic.

I encourage all subscribers to investigate this research on www.breggin.com.

I also call on whoever wins the Presidency to fire Dr. Anthony Fauci for the safety and health of us all, and prosecute him to the full extent of the law.

Also, as a word of advice, never consider taking Remdesivir (an expensive unproven deadly drug) highly promoted by Fauci. Remember to use what is proven effective: vitamin D3, zinc, Elderberry, Echinacea, and eat your fresh fruits and veggies. Stay away from processed grains, sugar and dairy. Get lots of sunshine. Get back to normal. Stop fearing Covid19 and distance yourself from medical bureaucrats.
